banks, subject to the guidelines specified in paragraph 12.16 of SEBI Master Circular for Mutual Funds, as amended from time to time. The Scheme will comply with the following guidelines/restrictions for parking of funds in short term deposits:-

"Short Term" for parking of funds shall be treated as a period not exceeding 91 days.

Such short-term deposits shall be held in the name of the Scheme.

The Scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with the approval of the Trustee.

Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.

The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.

The Scheme shall not park funds in short-term deposit of a bank which has invested in the said Scheme.

Further Trustees/AMC shall also ensure that a bank in which scheme has short term deposit does not invest in the Scheme until the Scheme has short term deposits with such bank.

AMC shall not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

However, the above provisions will not apply to term deposits placed as margins for trading in cash and derivatives market.

Overseas Investments by the Scheme:

According to paragraph 12.19 of SEBI Master Circular for Mutual Funds, mutual funds can invest in ADRs/GDRs/other specified foreign securities.

As per paragraph 12.19 of SEBI Master Circular for Mutual Funds, such investments are subject to an overall limit of US\$ 7 billion for all mutual funds put together. The Mutual Funds have been allowed an individual limit of US\$ 1 billion for overseas investments. The Scheme may, with the approval of SEBI/RBI invest in foreign securities as specified by SEBI. The overall ceiling for investment in overseas ETFs that invest in securities is US \$ 1 billion subject to a maximum of US \$ 300 million per mutual fund.

The AMC is allowed to invest in overseas securities upto 20% of the average Asset Under Management ('AUM') in overseas securities of the previous three calendar months subject to maximum limit of USD 1 billion per Mutual Fund. The above limits shall be considered as soft limits for the purpose of reporting only by Mutual Funds on monthly basis as per paragraph 12.19.1 of SEBI Master Circular for Mutual Funds.

Please refer to "Specific Risk Factors" for details on the risk factors associated with Overseas Investment.

The Mutual Fund may, where necessary appoint intermediaries as sub-managers, sub-custodians, etc. for managing and administering such investments. The appointment of such intermediaries shall be in accordance with the applicable requirements of SEBI and within the permissible ceilings of expenses.

The dedicated fund manager appointed for making overseas investments by the Mutual Fund will be in accordance with the applicable requirements of SEBI.

Portfolio Rebalancing:

As per paragraph 2.9 of SEBI Master Circular for Mutual Funds, as may be amended/ clarified from time to time, in the event of passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager is required to carry out portfolio rebalancing within thirty (30) business days. In case the portfolio is not rebalanced within the period of thirty (30) business days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of the scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall follow the requirements specified under the aforesaid regulation including reporting the deviation to Trustees at each stage.

	<p><u>Short term defensive consideration:</u></p> <p>Due to market conditions, the AMC may invest beyond the range set out in the asset allocation. Such deviations shall normally be for a short term and defensive considerations in line with paragraph 1.14.1.2(b) of SEBI Master Circular for Mutual Funds and the fund manager will rebalance the portfolio within 30 calendar days from the date of deviation.</p>
<p>Investment Strategy</p>	<p>The scheme will predominantly invest in the units of PGIM Jennison Emerging Markets Equity Fund (the Underlying Fund).</p> <p>About PGIM Jennison Emerging Markets Equity Fund (the Underlying Fund):</p> <p>Investment objective and policy:</p> <p>The Fund aims to seek long-term growth of capital. The Fund will seek to achieve its investment objective by investing primarily in equity and equity-related securities of companies located in or otherwise economically tied to emerging markets countries. The Fund may invest a large portion of its assets in a single country or region.</p> <p>The benchmark of the Fund is the MSCI Emerging Markets Index, however, the sub-investment manager has discretion over the investments of the Fund. The Fund will be actively managed and does not intend to track the benchmark. The benchmark is being used by the Fund for performance comparison purposes only.</p> <p>In determining which securities to buy and sell, the sub-investment manager analyzes individual companies that are located in or otherwise economically tied to emerging markets countries that it believes are in the early stages of acceleration in their growth due to: innovation in a technology, product, or service that disrupts the existing competitive landscape of an industry; a new product cycle or market expansion; acceleration in industry growth; an increase in the market for a company's product or service; leadership in a market niche; or benefits of a company's organizational restructuring.</p> <p>The Fund can invest without limit in non-U.S. equity and equity-related securities, typically invests in a number of different countries, and will invest a significant portion of its assets in companies located in emerging markets. Because the Fund may invest a large portion of its assets in a single country or region of the world, the Fund's investments may be geographically concentrated. This can result in more pronounced risks based upon economic conditions that impact one or more countries or regions more or less than other countries or regions.</p> <p>The Fund may also hold cash, on an ancillary basis, and invest in money market instruments, which may comprise fixed term deposits, investment grade fixed and floating rate instruments including (but not limited to) certificates of deposit, banker acceptances, freely transferable promissory notes, commercial paper, floating rate notes, debentures, asset backed commercial paper, government bonds, corporate bonds, asset backed securities and money market funds. The Fund may not be leveraged in excess of 100% of its net asset value, through the use of derivatives.</p> <p>Securitisation</p> <p>Asset securitisation is a process whereby commercial or consumer credits are packaged and sold in the form of financial instruments. A typical process of asset securitisation involves sale of specific Receivables to a Special Purpose Vehicle (SPV) set up in the form of a trust or a company. The SPV in turn issues financial instruments (e.g., promissory notes, pass through certificates or other debt instruments) to investors, such instruments evidencing the beneficial ownership of the investors in the Receivables. The financial instruments are rated by an independent credit rating agency. An Investor's Agent is normally appointed for providing trusteeship services for the transaction.</p> <p>On the recommendation of the credit rating agency, additional credit support (Credit Enhancement) may be provided in order that the instrument may receive the desired level of rating. Typically the servicing</p>

of the Receivables is continued by the seller in the capacity of the Servicer. Cash flows, as and when they are received, are passed onto the investors.

Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities, bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and infrastructure related agencies, debentures and money market instruments issued by the corporate sectors and banks.

The Indian bond market has witnessed increased issuance of bonds from government sponsored institutions, DFIs, and infrastructure related agencies since 1995. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They constitute reasonable amount of the trading volume on the Wholesale Debt Market platform of National Stock Exchange/Bombay Stock Exchange and are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. Most of the money is raised through the "Private Placement" route. These debentures/commercial papers are mostly rated by rating agencies like CRISIL, ICRA, CARE and India Ratings. There is an active secondary market for these debentures/commercial papers (CPs).

The Government of India routinely issues government securities and Treasury bills for liquidity and fiscal management. While the government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, the coupon-bearing government securities are issued for maturity ranging from 1 year to as high as 50 years. Both the Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India.

Certificate of Deposits (CDs) are mostly issued by scheduled commercial banks for tenor ranging from 7 days to 1 year. Select Financial Institutions can also issue CDs for tenor above 1 year and upto 3 years. CDs are more liquid than CPs.

Risk Control

Since investing requires disciplined risk management, the AMC would incorporate adequate safeguards for controlling risks in the portfolio construction process.

The risk control process involves reducing risks through portfolio diversification, taking care however not to dilute returns in the process. The AMC believes that this diversification would help achieve the desired level of consistency in returns. Stock specific risk will be minimized by investing only in those companies that have been analyzed by the Investment Team at the AMC. For investments in debt securities, the AMC aims to identify securities, which offer superior levels of yield at lower levels of risks. With the aim of controlling risks, rigorous and in-depth credit evaluation of the securities proposed to be invested in, will be carried out by the investment team at the AMC. Rated Debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC will be guided but not limited by the ratings of Rating Agencies such as CRISIL, CARE, ICRA and Fitch or any other rating agencies that may be registered with SEBI from time to time. In case a debt instrument is not rated, investment will be in accordance with Guidelines approved by the Board. Further, all investments in the unrated paper are periodically reviewed by Investment Committee and the Board of AMC & Trustee Company.

The Scheme may also use various derivatives and hedging products from time to time, as would be available and permitted by SEBI, in an attempt to protect the value of the portfolio and enhance Unitholders' interest.

Portfolio Turnover

Portfolio turnover is defined as the aggregate of purchases and sales as a percentage of the corpus of the Scheme during a specified period of time. Portfolio turnover in the Scheme will be a function of market opportunities. The economic environment changes on a continuous basis and exposes debt portfolio to systematic as well as nonsystematic risk. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

The Investment Manager will endeavor to optimise portfolio turnover to optimise risk adjusted return keeping in mind the cost associated with it. A high portfolio turnover rate is not necessarily a drag on portfolio performance and may be representative of arbitrage opportunities that exist for scrip/securities held in the portfolio rather than an indication of a change in AMC's view on a scrip, etc.

<p>Risk Profile of the scheme</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Investment in the scheme will involve certain Scheme specific Risk Factors which are summarized below:</p> <p>A. Risk Associated with PGIM Jennison Emerging Markets Equity (the Underlying fund):</p> <ul style="list-style-type: none"> • Liquidity Risk on account of investments in international funds: The investments are made in international funds, which provide daily liquidity. However there exists a possibility that different settlement cycles and foreign exchange conversion could lead to delay in receipt of redemption proceeds. To mitigate this risk, daily cash management monitoring is performed by taking into consideration future cash flows on account of redemptions as well as subscriptions into/from the domestic fund. The endeavor is to maintain an adequate liquidity cushion in Indian Rupee terms by making investments in very short term money market instruments and/or liquid schemes in India. • Expense Risks associated with investments in international funds: Any increase in the expense structure of the international funds is not expected to have any impact as the aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI. • Portfolio Disclosure Risks associated with investments in international fund: Although full portfolio disclosure is not available at the end of each month, top ten holdings are made available at the end of each month for the international fund end of each month, top ten holdings are made available at the end of each month for the international fund. • Investment Policy and/or fundamental attribute change risks associated with investments in international funds: Investments are made in such international funds, which have similar investment objectives to the domestic fund in India. However there exists possibility that there is a change in the fundamental attributes of the international fund. In such circumstances, the Investment Manager will seek to invest in other international funds, which have the same investment objective as the domestic fund. • Special risk consideration related to international fund: To the extent of the investments in PGIM Jennison Emerging Markets Equity Fund, the risks of global equity will exist. The investors should note that these risks cannot be completely mitigated as these are international funds managed by Jennison Associates. However, as a part of our due diligence, we have chosen funds, which have long term performance track record, stability of fund management team and are accredited by third party funds evaluators like Morningstar. <p>B. Risk profile/ control of the Scheme with relation to PGIM Jennison Emerging Markets Equity Fund (the Underlying fund):</p> <p>PGIM India Asset Management Private Limited (PGIM India AMC) is committed to a strong control and compliance environment and ensuring that the management structure is appropriate to the scale of the business. PGIM India AMC's fiduciary business is managed according to the rules and a regulation stipulated for Asset Management Companies by the Securities & Exchange Board of India (SEBI) and also incorporates PGIM India AMC's internal policies. The AMC has systems and processes to monitor all the investment restrictions specified by SEBI and in this document on a regular basis.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
