Part II. Information about the Scheme

A. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

The asset allocation in the Scheme under normal circumstances will be as follows:-

Instruments	Indicative Allocations (% of total assets)	
	Minimum	Maximum
Securities # comprising the CRISIL-IBX Gilt Index - April 2028	95%	100%
*Money Market Instruments, Government securities, T-Bills, including Triparty Repo, cash and cash equivalents and units of liquid mutual fund	0%	5%

#As per Paragraph 3.5.4 of SEBI Master Circular for Mutual Funds, scheme shall be considered to be replicating the underlying index, provided:

- i. The duration of the portfolio of ETF/ Index Fund replicates the duration of the underlying index within a maximum permissible deviation of +/- 10%.
- ii. In case of Target Maturity (or Target Date) ETFs/ Index Funds, the following norms for permissible deviation in duration shall apply:
 - a) For portfolio with residual maturity of greater than 5 years: Either +/- 6 months or +/- 10% of duration, whichever is higher.
 - b) For a portfolio with residual maturity of up to 5 years: Either +/- 3 months or +/- 10% of duration, whichever is higher.
 - c) However, at no point of time, the residual maturity of any security forming part of the portfolio shall be beyond the target maturity date of the ETF/ Index Fund.

*Money Market Instruments will include Commercial Paper, Certificates of Deposit, Treasury Bills, Repos, short-term Government securities having an unexpired maturity upto one year and any other such short-term instruments as permitted by SEBI / RBI from time to time, including schemes of mutual funds.

During normal circumstances, the Scheme's exposure to money market instruments will be in line with the asset allocation table. However, in case of maturity of G-Secs in the Scheme portfolio, the reinvestment will be in line with the index methodology.

Indicative Table: (Actual instrument/percentages may vary subject to applicable SEBI circulars)

However, cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure.

The Fund Manager would monitor the Tracking Error of the Scheme on an ongoing basis and would seek to minimize the Tracking Error to the extent possible. Under normal circumstances, the AMC shall endeavor that the Tracking Error of the Scheme shall not exceed 2%. For the Fund the annualized tracking difference averaged over one year period shall not exceed 1.25%. There can be no assurance or guarantee that the Scheme will achieve any particular level of Tracking Error relative to performance of the underlying Index.

Portfolio Rebalancing

As per paragraph 2.9 of SEBI Master Circular for Mutual Funds, as may be amended/ clarified from time to time, in the event of passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager is required to carry out portfolio rebalancing within thirty (30) business days. In case the portfolio is not rebalanced within the period of thirty (30) business days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of the scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall follow the requirements specified under the aforesaid regulation including reporting the deviation to Trustees at each stage.

B. WHERE WILL THE SCHEME INVEST?

Subject to the Regulations and other prevailing laws as applicable, the corpus of the Scheme can be invested in any (but not exclusively) of the following securities:

1. Securities that are part of the CRISIL-IBX Gilt Index - April 2028.

2. Securities created and issued by the Central and State Governments and/or repos/reverse repos in such Government Securities as may be permitted by RBI (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
3. Securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills).
4. Debt securities issued by domestic Government agencies and statutory bodies, which may or may not carry a Central/State Government guarantee.
5. Corporate debt securities (of both public and private sector undertakings).
6. Securities issued by banks (both public and private sector) as permitted by SEBI from time to time and development financial institutions.
7. Money market instruments permitted by SEBI, having maturities of up to one year, or in alternative investment for the call money market.
8. Certificate of Deposits (CDs).

13. Any other instruments, as may be permitted by RBI / SEBI / such other Regulatory Authority, from time to time, subject to regulatory approval.

The securities mentioned above could be listed or permitted unlisted, privately placed, secured or unsecured, rated or un-rated and of any maturity, as enabled under SEBI Regulations/ circulars/ RBI. The securities may be acquired from primary market/ initial public offer, secondary market operations, private placement or negotiated deals.

C. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme will invest in the constituents of the underlying index viz. CRISIL-IBX Gilt Index - April 2028, and will use a passive investment approach to manage the portfolio, subject to tracking error. Passive investment means the scheme will invest in the securities included in its underlying index regardless of their investment merit. The underlying investments may be affected by a general decline in the Indian markets relating to its Underlying Index and the AMC does not attempt to take defensive positions during such declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.

The fund manager's endeavor would be to rebalance the portfolio in order to replicate the underlying index. However, there may be a short period where the constituents of the portfolio may differ from that of the underlying index. In case of any deviation from the asset allocation pattern, the portfolio to be rebalanced by AMC within 7 days from the date of said deviation.

D. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Benchmark (Total Returns Index): CRISIL-IBX Gilt Index - April 2028.

As required under paragraph 1.9 of SEBI Master Circular for Mutual Funds, the benchmark has been selected from amongst those notified by AMFI as the first tier benchmark to be adopted by mutual funds and which are reflective of the category of the scheme.

The CRISIL-IBX Gilt Index - April 2028 seeks to measure the performance of portfolio predominantly invested in G-Sec maturing between 06 September 2027 and 05 April 2028. The index shall mature on 05 April 2028.

Features

- Total Return Index seeking to capture price and coupon returns of the underlying portfolio.

- It's a target date index which follows a roll-down approach.
- The index uses a buy and hold strategy wherein the portfolio of G-sec is held till maturity unless they become ineligible
- Small portion of portfolio (2%) is invested in on-the-run 91 Day T-bill for liquidity
- Index portfolio marked-to-market on a daily basis using CRISIL Gilt and T-Bills valuations
- Inception Date of Index: 28 February 2021.

Key Characteristics

- **Replicability:** The index constituents are valued on a daily basis. This lends the index a realistic approach by having the valuations close to the market levels

Methodology

- Weights of the G-sec securities and T-bills Securities in the Index will be 98% and 2% respectively.
- Securities Selection methodology in G-Sec are as follows:
 - All securities selected will have a maturity date in the eligible period of G-sec which is from 06 September 2027 to 05 April 2028.
 - All Securities are selected on the basis of Amount Outstanding.
 - Minimum Amount Outstanding should be Rs. 25000 crores.
 - Weights to individual securities will be calculated in the ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
 - Liquidity score will be calculated based on the volume traded (70%), number of trades (15%) and days traded (15%) in the previous quarter.
 - Eligible securities will be added on a 6 monthly basis and weights will be redistributed based on ratio of amount outstanding (30% weightage) and liquidity score (70% weightage).
- Securities Selection methodology in T-Bills are as follows:
 - Three 91-Day T-Bill will be selected by rebalancing on a bimonthly basis.
 - This will consist of last three on-the-run 91-Day T-Bills as on the bi-monthly (once in two months) rebalancing date.
 - The maturity date of such T-bill selected should not be greater than the maturity of the fund.
 - In case no such 91 Day on-the-run T-Bill is available closer to the maturity date of the fund, T-Bill that is closest to the maturity date but maturing before the maturity date of index will be selected.
 - If such T-Bill matures as well, the proceeds will be invested in TREPS.
 - The T-bills will be weighted equally on each rebalancing date.
- As the index includes securities that shall mature during the last 6 months period ending on the final maturity date of the index, any proceeds from the redemption of securities prior to the final maturity date of the index shall be reinvested according to following waterfall approach –
 - a) The proceeds from security redemption will be reinvested in the longest maturity outstanding government security issued and maturing on or just before the index maturity date.
 - b) In case a replacement in the form of another outstanding government security cannot be found for reinvestment then the proceeds from such redemption shall be reinvested in the remaining portfolio on the same date in the proportion of the existing weights.
 - c) In case due to any reason, it is not possible to meet the requirements stated in point (a) and (b) above, then the proceeds from such redemption shall be reinvested in a T-Bill maturing on or just before the index maturity date.
 - d) If the last outstanding security (including T-Bill) in the index matures before the final index maturity date, all redemption proceeds shall be assumed to be re-invested in The Clearing Corporation of India Ltd.'s (CCIL) TREPS overnight rate for any subsequent days till the maturity of the index.
- The relative weights of the Government securities and asset classes will change due to price movement and will be reset during the 6 monthly rebalancing.
- While rebalancing (security addition/ deletion/ weights reset), Impact Cost for each asset class will be as follows:
 - G-sec: 1.5 bps on each leg (total 3 bps)
 - T-bills: 0 bps on each leg (total 0 bps)

Any index having maturity date on a weekend (Saturday and Sunday) or on a holiday, or on an unplanned market off, will mature on the next business day.

F. HOW IS THE SCHEME DIFFERENT FROM EXISTING SCHEMES OF THE MUTUAL FUND?

This is a new Scheme under the Index Fund category and there are no other existing schemes for differentiating the Scheme proposed to be launched. Hence, the same is not applicable

G. HOW HAS THE SCHEME PERFORMED?

Performance of the Scheme as on September 30, 2025:

Compounded Annualised Returns ^{^^}	Regular Plan Returns [^] (%)	Direct Plan Returns [^] (%)	Benchmark Returns# (%)
Returns for last 1 Year	7.82	7.98	8.26
Returns since Inception	8.06	8.25	8.60

Past performance may or may not be sustained in future & should not be used as a basis of comparison with other investments.

[^] Returns are calculated on Growth Option NAV.

^{^^} Returns are calculated on Compounded Annualised basis for a period of more than a year and on an absolute basis for a period of less than or equal to a year.

#CRISIL-IBX Gilt Index - April 2028

Inception Date: Regular Plan and Direct Plan: February 22, 2023

Absolute Returns for each Financial Year

Returns are computed from the date of allotment/1st April, as the case may be, to 31st March of the respective financial year.

Part III- OTHER DETAILS

A. COMPUTATION OF NAV

NAV of Units under the Scheme will be calculated by following method:

NAV (Rs.) =	Market or Fair Value of Scheme's investments + Current Assets - Current Liabilities and Provisions
	No. of Units outstanding under the Scheme

- The NAV is rounded off upto 4 decimal places.
- Separate NAV will be calculated and disclosed for each Plan/Option.
- The AMC will calculate and disclose the NAV of the Scheme on all the Business Days.
- The valuation of the Scheme's assets and computation of the Scheme's NAV shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time.

The numerical illustration of the above method is provided below:

Market or Fair Value of Scheme's investment (Rs.) = 1,15,12,05,600.00

Current Assets (Rs.) = 60,00,000.00

Current Liabilities (Rs.) = 40,00,000.00

No of units Outstanding under the scheme = 10,00,00,000

$$\text{NAV Per Unit (Rs.)} = \frac{115,12,05,600 + 60,00,000 - 40,00,000}{10,00,00,000} = 11.5321$$

The aforesaid provision pertaining to “ Calculation of NAV” shall apply in respect of each individual scheme and / or plan as the case may be. The NAV per unit above is rounded off to four decimals

The NAV will be calculated as of the close of every Business Day.

Methodology for calculation of sale and re-purchase price of the units of mutual fund scheme:

<p>Ongoing price for subscription (purchase)/ switch-in (from other Schemes of the Mutual Fund) by investors.</p> <p>This is the price you need to pay for purchase /switch-in.</p>	<p>At the applicable NAV.</p> <p>Ongoing Price for subscription = Applicable NAV*(1+ Entry Load, (if any))</p> <p>Example:</p> <p>If the Applicable NAV is Rs.10, Entry Load is nil then sales price will be</p> <p>= Rs. 10* (1+0)</p> <p>= Rs. 10</p>
<p>Ongoing price for redemption (sale) /switch outs (to other schemes of the Mutual Fund) by investors.</p> <p>This is the price you will receive for redemptions/switch outs.</p>	<p>At the applicable NAV, subject to prevailing exit load.</p> <p>Redemption Price = Applicable NAV*(1- Exit Load, (if any))</p> <p>Example:</p> <p>If the Applicable NAV is Rs.10, Exit Load is 1% then redemption price will be</p> <p>= Rs. 10* (1-0.01)</p> <p>= Rs. 9.90</p>

The Redemption Price will not be lower than 97% of the NAV or as permitted / prescribed under the SEBI Regulations from time to time.

For other details such as policies w.r.t computation of NAV, rounding off, investment in foreign securities, procedure in case of delay in disclosure of NAV etc. Kindly refer SAI.

B. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc. all such expenses are borne by the AMC.

C. ANNUAL SCHEME RECURRING EXPENSES

These are the fees and expenses for operating the Scheme. These expenses include the Investment Management and Advisory Fee charged by the AMC, Registrar and Transfer Agents' Fee, marketing and selling costs etc. as given below:

The AMC has estimated that up to **1.00 %** of the daily net assets of the scheme will be charged to the scheme as expenses.

Operating & recurring expenses under regulation 52 (6) & 52 (6A):

- a) The total expense ratio that can be charged to the Scheme, excluding issue or redemption expenses, whether initially borne by the mutual fund or by the AMC, but including the investment management and advisory fee shall be as 1 % of the scheme daily net asset:
- b) In addition to the annual recurring expenses stated in (a) above, the following costs or expenses may be charged to the Scheme:-
 - i. Brokerage and transaction cost incurred for the purpose of execution shall be charged to the schemes as provided under Regulation 52 (6A) (a) upto 0.12 percent and 0.05 per cent for cash market transactions and derivatives transactions respectively. Any payment towards brokerage & transaction costs, over and above the said 0.12 per cent and 0.05 per cent for cash market transactions and derivatives transactions respectively may be charged to the Scheme within the maximum limit of Total Expense Ratio (TER) as prescribed under Regulation 52 of the SEBI (Mutual Funds) Regulations, 1996.
 - ii. Additional expenses not exceeding 0.05 per cent of daily net assets of the scheme, towards the investment and advisory fees or various other permissible expenses; (It may be noted that these expenses will not be charged in case the scheme does not charge an exit load)

Within such total recurring expenses charged to the Scheme as above, the investment management and advisory fee (charged as a percentage of daily net assets) would be as decided by the AMC from time to time, provided that the investment management and advisory fee shall not exceed the aggregate of expenses charged under clause (a) and (b) (iii) above.

In terms of paragraph 10.1.16 of SEBI Master Circular for Mutual Funds, the AMC shall annually set apart at least 0.01% on daily net assets within the maximum limit of recurring expenses as per Regulation 52 for investor education and awareness initiatives.

The maximum annual recurring expenses of the Scheme including the investment management and advisory fee (together with additional management fee wherever applicable) shall not exceed the limit stated in Regulation 52 read with paragraph 10.1 of SEBI Master Circular for Mutual Funds, as explained above.

Goods and Services tax (GST):-

- AMC may charge GST on investment and advisory fees of the Scheme in addition to the maximum limit of TER as per the Regulation 52(6) and (6A).
- GST on expenses other than investment and advisory fees: AMC may charge GST on expenses other than investment and advisory fees of the Scheme, if any within the maximum limit of TER as per the Regulation under 52(6) and (6A).
- GST on brokerage & transaction cost: GST on brokerage and transaction costs which are incurred for the purpose of execution of trade, will be within the limit of expenses as per the Regulation 52(6) and (6A). Further, the Goods and Services tax on exit load, if any, shall be paid out of the exit load proceeds and the exit load net of Goods and Services tax, if any, shall be credited back to the scheme.

All fees and expenses charged in the Direct Plan (in percentage terms) under various heads including the investment and advisory fee shall not exceed the fees and expenses charged under the Regular Plan. The Direct Plan under the Scheme shall have a lower expense ratio as compared to the Regular Plan. Commission/ Distribution expenses will not be charged in case of Direct Plan. The Direct Plan shall also have separate NAV. For the actual current expenses being charged, the investor may refer to the website of the Mutual Fund (<https://www.pgimindia.com/mutual-funds>). Further, the disclosure of Total Expense Ratio (TER) on a daily basis shall also be made on the website of AMFI (<https://www.amfiindia.com>). The Mutual Fund would update the expense ratios on the website at least three business days prior to the effective date of the change. Additionally, TER is also available on website <https://www.pgimindia.com/mutual-funds>.

Expense Head	% of daily Net Assets
Investment Management and Advisory Fees	Upto 1.00%
Trustee fee	
Audit fees	
Custodian fees	
RTA Fees	
Marketing & Selling expense including agent commission	
Cost related to investor communications	
Cost of fund transfer from location to location	
Cost of providing account statements and IDCW redemption cheques and warrants	
Costs of statutory Advertisements	
Cost towards investor education & awareness (at least 1 bps)^	
Brokerage & transaction cost over and above 12 bps for cash market trades	
Goods and Services tax on expenses other than investment and advisory fees	
Goods and Services tax on brokerage and transaction cost	
Other Expenses*	
Maximum total expense ratio (TER) permissible under Regulation 52 (6) (b)	Upto 1.00%
Additional expenses under regulation 52 (6A) (c)	Upto 0.05%**

^ In terms of Paragraph 10.1.16 of SEBI Master Circular for Mutual Funds, the AMC / Mutual Fund shall annually set apart at least 1 basis points (i.e. 0.01%) on daily net assets of the scheme within the maximum limit of Total Expense Ratio as per Regulation 52 of the SEBI (MF) Regulations for investor education and awareness initiatives.

*Any other expenses which are directly attributable to the Scheme, except those expenses which are specifically prohibited, may be charged with the approval of the Trustee within the overall limits specified in the SEBI (Mutual Funds) Regulations.

** It may be noted that these expenses will not be charged in case the scheme does not charge an exit load.

The purpose of the above table is to assist the investor in understanding the various costs & expenses that an investor in the Scheme will bear directly or indirectly. The above expenses (including Investment Management and Advisory Fees) are subject to inter-se change and may increase/decrease as per actual and/or any change in the Regulations. All types of expenses charged to the Scheme shall be in accordance with the SEBI (MF) Regulations.

The entire exit load (net of Goods and services tax), charged, if any, shall be credited to the Scheme.

Illustration of impact of expense ratio on scheme's returns

Particulars	Regular Plan	Direct Plan
Amount Invested at the beginning of the year (in Rs.)	10,000.00	10,000.00
Returns after Brokerage and Transaction Cost but before other expenses and Investment Management and Advisory Fees (in Rs.)	1,000.00	1,000.00
Returns after Brokerage and Transaction Cost but before other expenses and Investment Management and Advisory Fees (%)	10.00%	10.00%
Distribution Expenses (in Rs.)	150.00	0.00
Expenses other than Distribution Expenses (in Rs.)	20.00	20.00
Investment Management and Advisory Fees (in Rs.)	60.00	60.00
Returns after Brokerage and Transaction Cost ,other expenses and Investment Management and Advisory Fees (in Rs.)	770.00	920.00

The present illustration is calculated pursuant to the requirements of paragraph 5.8.2.2 of SEBI Master Circular for Mutual Funds. The purpose of an illustration is to purely explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments. Actual returns on your investment may be more, or less. The expenses of the Direct Plan under the Scheme will be lower to the extent of distribution expenses/commission. The NAVs published by the AMC are net of scheme expenses and they reflects return on investment to investors, provided investment is not subject to exit load. Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

D. LOAD STRUCTURE

Exit Load is an amount which is paid by the investor to redeem the units from the scheme. Load amounts are variable and are subject to change from time to time.

The load structure of the Scheme is as follows:

Type of Load	Load chargeable (as % of NAV)
Exit	NIL

The AMC/Trustee reserves the right to change / modify the Load structure of the Scheme, subject to maximum limits as prescribed under the Regulations.

Exit Load for switches within the Scheme:

- Where the investments are routed through a distributor (i.e. made with distributor code) any Switch of Units from the Regular Plan to Direct Plan shall not be subject to applicable exit load; However, after the switch, exit load prevailing on the date of the switch shall apply for subsequent redemption from the Direct Plan.
- Where investments are made directly i.e. without any distributor code, exit load will not be levied on switch of Units from Regular Plan to Direct Plan. In such cases, after the switch, exit load prevailing on the date of the switch shall apply for subsequent redemption from Direct Plan, if any;
- No exit load shall be levied in case of switch of Units from Direct Plan to Regular Plan. However, after the switch, exit load prevailing on the date of the switch shall apply for subsequent redemption from the Regular Plan.

The Switches would be done at the Applicable NAV based prices and the difference between the NAVs of the two Plans/Options will be reflected in the number of units allotted.

Load exemptions:

AMC shall not charge any load on units allotted on reinvestment of IDCW for existing as well as prospective investors.

Any change in the load structure shall be applicable on prospective investments only. For any change in load structure, the AMC will issue an addendum and display it on its Website (<https://www.pgimindia.com/mutual-funds>) and Investor Service Centers. The addendum will also be circulated to all the distributors / brokers, so that the same can be attached to all SIDs and Key Information Memorandum in stock till the same is updated and reprinted. The AMC would make arrangements to display the addendum to the SID in the form of a notice at all the Investor Service Centers. The change in the Exit Load would be disclosed in the statement of accounts issued after the introduction of such Load. Any other measures which the Mutual Fund may feel necessary would be undertaken.

The investors are requested to check the prevailing load structure of the Scheme before investing.

For the current applicable exit load structure, please refer to the website of the AMC (<https://www.pgimindia.com/mutual-funds>) or may call at 1800 209 7446 (toll free no.) or your distributor.

Interpretation

For all purposes of this SID, except as otherwise expressly provided or unless the context otherwise requires:-

- All references to the masculine shall include the feminine and all references to the singular shall include the plural and vice versa.
- All references to “Dollars” or “\$” or USD refer to Dollars of United States of America and “Rs.” or INR refer to Indian Rupees. A “Crore” means “ten million” and a “lakh” means a “hundred thousand”.
- All references to timings relate to Indian Standard Time (IST).
- References to a day are to a calendar day, including a non-Business Day.
- All references to “Master Circular” refer to Master Circular for Mutual Funds issued by SEBI dated June 27, 2024 as amended from time to time.

B. Risk factors

i. Standard Risk Factors:

For Standard Risk Factors, kindly refer Statement of Additional Information (SAI)

ii. Scheme specific risk factors

Some of the Scheme specific risk factors include, but not limited, to the following:-

1. Passively Managed Portfolio: As the scheme proposes to invest not less than 95% of the net assets in the securities of the underlying Index, the scheme will not be actively managed. As PGIM India CRISIL IBX Gilt Index – Apr 2028 Fund is not actively managed, the scheme invests in the securities included in its underlying index regardless of their investment merit. The underlying investments may be affected by a general decline in the Indian markets relating to its Underlying Index and the AMC does not attempt to take defensive positions during such declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis.
2. The liquidity of the Scheme’s investments may be inherently restricted by trading volumes, settlement periods and transfer procedures. In the event of an inordinately large number of redemption requests, or of a re-structuring of the Scheme’s investment portfolio, these periods may become significant.

3. Tracking error risk

Tracking error is defined as the annualized standard deviation of the difference in daily returns between the NAV of the Scheme and the Underlying Index. Theoretically, the corpus of the Scheme has to be fully invested in the securities comprising the Underlying Index in the same proportion of weights as the securities have in the Underlying Index. However, deviations from the stated index replication may occur due to reason that the Scheme has to incur expenses, corporate actions pertaining to the Index including changes to the constituents, regulatory policies, ability of the Fund Manager to replicate the Underlying Index, delay in purchase or non-availability of underlying securities forming part of the index etc. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the extent possible. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2%. However, in certain events like market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC, if any.

4. Tracking Difference Risk

The Fund Manager may not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. Tracking Difference is the Difference of daily returns between the Scheme and the Benchmark Index annualized over 1 year, 3 Year, 5 Year, 10 year and Scheme Since Inception period. It will be the endeavor of the fund manager to keep the tracking difference as low as possible. The Fund must maintain an annualized Tracking Difference averaged over one year period of not more than 1.25%. If the tracking difference averaged over one year period is higher than 1.25%, the same shall be brought to the notice of trustees with corrective actions taken by the AMC, if any. Tracking difference will be disclosed on a monthly basis on <https://www.pgimindia.com/mutual-funds/> and AMFI website.

5. Risk Factors Associated with Fixed Income and Money Market Instruments:

- a) The Scheme may invest in debt and debt related instruments, as may be permitted by SEBI, from time to time. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of these investments. Different segments of Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities' purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. The length of time for settlement may affect the Scheme in the event the Scheme has to meet an exceptionally large number of redemption requests. The Scheme will retain certain investments in cash or cash equivalents for its day-to-day liquidity requirements.
- b) A fundamental risk relating to all fixed income securities is a chance that an issuer will fail to make a principal and interest payment when due (credit risk). Issuers with higher credit risks typically offer higher yields for this added risk. Conversely, issuers with lower credit risk offer lower credit yields. Generally government securities are considered to be the safest in terms of the credit risk. Changes in financial conditions of an issuer, changes in economic and political conditions in general, or changes in economic or and political conditions specific to an issuer, all of which are factors that may have an adverse impact on a firms credit quality and security values. While it is the intent of the Investment Manager to invest primarily in highly rated debt securities, the Schemes may from time to time invest in higher yielding, lower rated securities. This is likely to enhance the degree of credit risk. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.

- c) All fixed income securities are also affected by changes in interest rates (interest rate risk). The prices of debt securities generally increase as interest rates decline and generally decrease as interest rates rise. Prices of long-term securities generally fluctuate more in response to interest rate changes than the short-term securities. The Debt markets can be volatile leading to the possibility of up or down movements in prices of fixed income securities and thus the possible movements in the NAV. The Scheme may use various hedging products from time to time, as are available and permitted by SEBI, to attempt to reduce the impact of undue market volatility on the Scheme's portfolio.
- d) Debt securities may also be subject to price volatility due to factors such as market perception of the issuer and general market liquidity conditions (market risk).
- e) Lower rated or unrated securities are more likely to react to developments affecting the credit market than highly rated securities, which react primarily to movements in the general level of interest rates. Lower rated securities also tend to be more sensitive to economic conditions than higher rated securities. The Investment Manager will consider both credit risk and market risk in making investment decisions.
- f) The corporate debt market is relatively illiquid vis-à-vis the government securities market. Even though the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.
- g) Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically and are likely to respond to changes in interest rates to a greater degree than other coupon bearing securities having similar maturities and credit quality.
- h) Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity or till the time interest payment on the bonds commences. If the issuer defaults, the Scheme may not obtain any return on its investment.
- i) The Scheme may invest in securities which are not quoted on a stock exchange ("unlisted securities") which in general are subject to greater price fluctuations, less liquidity and greater risk than those which are traded in the open market. Unlisted securities may lack a liquid secondary market, and there can be no assurance that the Scheme will realise its investments in unlisted securities at a fair market value, if sold in the secondary market
- j) There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.
- k) Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.
- l) Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Plans are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- m) Settlement Risk: The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the Scheme's portfolio due to the extraneous factors that may impact liquidity would result at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the Scheme's portfolio.

- n) Regulatory Risk: Changes in government policy in general and changes in tax benefits applicable to Mutual Funds may impact the returns to investors in the Scheme.
- o) The value of the Scheme's investments may be affected generally by factors affecting capital markets, such as interest rates, currency exchange rates, foreign investment, changes in government policy, taxation and political, economic or other developments. Consequently, the net asset value of the Scheme may fluctuate and the value of the Scheme's Units may go down or up. Past performance of the Sponsor is not necessarily indicative of future performance of the Scheme.
- p) Money Market instruments are instruments that are generally have maturity of less than one year. The NAV of the Scheme's Units, will be affected by the changes in the level of interest rates.
- q) Investments in money market instruments and debt instruments involve credit risk commensurate with short term rating of the issuers.

6. Risks associated with investing in Government of India Securities:

There is liquidity risk with fixed rate Government of India Securities even though the Government of India Securities market is more liquid compared to other debt instruments, on certain occasions, there could be difficulties in transacting in the market due to extreme volatility leading to constriction in market volumes. While Government of India Securities generally carry relatively minimal credit risk since they are issued by the Government of India, they do carry price risk depending upon the general level of interest rates prevailing from time to time. Generally, when interest rates rise, prices of fixed income securities fall and when interest rates decline, the prices of fixed income securities increase. The extent of fall or rise in the prices is a function of the coupon rate, days to maturity and the increase or decrease in the level of interest rates. The price-risk is not unique to Government of India Securities. It exists for all fixed income securities. Therefore, their prices tend to be influenced more by movement in interest rates in the financial system than by changes in the government's credit rating. By contrast, in the case of corporate or institutional fixed income Securities, such as bonds or debentures, prices are influenced by their respective credit standing as well as the general level of interest rates.

7. Risks associated with segregated portfolio

- Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- Security comprising of segregated portfolio may not realise any value
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV

8. Risks associated with investing in Tri-Party Repo through CCIL (TREPS)

The mutual fund is a member of securities segment and Tri-party Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Tri-party Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. CCIL maintains prefunded resources in all the clearing segments to cover potential losses arising from the default member. In the event of a clearing member failing to honour his settlement obligations, the default Fund is utilized to complete the settlement. The sequence in which the above resources are used is known as the "Default Waterfall". As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member).

9. Risks factors associated with processing of transaction through Stock Exchange Mechanism:

The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).

10. Risk on Right to limit redemption:

Subject to the approval of Board of Directors of the AMC and Trustee Company and immediate intimation to SEBI, a restriction on redemptions may be imposed by the Scheme under certain exceptional circumstances, which the AMC / Trustee believe that may lead to a systemic crisis or event that constrict liquidity of most securities or the efficient functioning of markets. Please refer to the paragraph “Right to Limit Redemptions” for further details.

11. Risks associated with investment in mutual fund units:

Investment in units of Mutual Fund scheme involves investment risks such as, but not limited to, trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal. The value of units of mutual fund scheme may fluctuate based on the price / value / interest rates of the underlying securities in which the mutual fund scheme invests. The value of underlying securities may be affected, inter-alia, by changes in market environment, interest rates, changes in credit rating, trading volumes, settlement periods and transfer procedures. The NAV is also exposed to price/interest rate risk and credit risk and may be affected inter-alia, by the counterparty’s ability or willingness to meet its contractual obligations, government policy, volatility and liquidity in the money markets and pressure on the exchange rate of the rupee. Investment in units of mutual fund scheme is also exposed to risk of suspension of subscriptions / redemptions of the units, change in fundamental attributes etc. Since the Scheme may invest in schemes of Mutual Funds, scheme specific risk factors of each such mutual fund scheme will be applicable to the Scheme portfolio.

C. Risk mitigation Strategies

The Fund by utilizing a holistic risk management strategy will endeavor to manage risks associated with investing in debt markets. The risk control process involves identifying & measuring the risk through various risk measurement tools.

The Fund has identified following risks of investing in debt and designed risk management strategies, which are embedded in the investment process to manage such risks.

Nature of Risk	Risk Mitigation Measures by AMC
For making investment in fixed income and money markets	
<p>Liquidity Risk: The debt market is relatively illiquid although the government securities market is more liquid compared to that of other debt instruments, on occasions, there could be difficulties in transacting in the market due to extreme volatility or unusual constriction in market volumes or on occasions when an unusually large transaction has to be put through.</p>	<p>Securities in the underlying index are selected by applying liquidity as one of the criteria’s and hence the portfolio is expected to be reasonably liquid.</p>

<p>Settlement Risk: Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are not invested and no return is earned thereon.</p>	<p>The AMC has well laid out processes and systems, which mitigate operational risks attached with the settlement process.</p>
<p>Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Plans are reinvested. The additional income from reinvestment is the “interest on interest” component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p>	<p>Reinvestment risk will be managed as per the criteria’s laid out in the underlying index with respect to maturity of the securities forming part of the underlying index and as permitted by the regulations.</p>

Position of Debt Market in India

The Indian debt market, one of the largest in Asia, is developing rapidly buoyed by a multitude of factors including new instruments, increased liquidity, deregulation of interest rates and improved settlement systems. The major players in the Indian debt markets today are banks, financial institutions, insurance companies, pension funds, provident funds and mutual funds. The

instruments in the market can be broadly categorized as those issued by corporates, banks, financial institutions and those issued by state/central governments. The risks associated with any investments are - credit risk, interest rate risk and liquidity risk. While corporate papers carry credit risk due to changing business conditions, government securities carry zero credit risk. Interest rate risk is present in all debt securities and depends on a variety of macroeconomic factors. The largest segment of the Indian Debt market consists of the Government of India securities where the daily average trading volume is in excess of around Rs. 50,000 crores, with instrument tenors ranging from short dated Treasury Bills to long dated securities extending upto 50 years. The Corporate bond market, though relatively less liquid, is also fast developing with an increased participation from the banks, financial institutions, mutual funds, provident funds, insurance companies and corporate treasuries. Public Financial Institutions, Public Sector Undertakings and Private AAA Corporates are the major issuers. Corporate bonds majorly are issued as fixed rate bonds. The yield curve usually tends to be positive sloping i.e. yield of shorter dated securities being lower than that of longer dated ones.

The money markets in India essentially consist of call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at specified price), Tri-Party Repo, commercial papers (CPs, short term unsecured promissory note, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). A predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates.

The various instruments currently available for investments are:

Issuer	Instrument	Maturity	Yields (%) as on November 13, 2025	Liquidity
